

BSI Standards Publication

Guidance on the application of ISO 13849-1 and IEC 62061 in the design of safety-related control systems for machinery

National foreword

This Published Document is the UK implementation of ISO/TR 23849:2010.

ISO/TC 199 and IEC/TC 44 have jointly developed this Technical Report in support of the application of ISO 13849-1 and IEC 62061; however, these bodies have opted to publish the guide separately. The resulting publications are ISO/TR 23849:2010 and IEC/TR 62061-1:2010, which are technically identical in content.

The UK participation in its preparation was entrusted to Technical Committee MCE/3, Safeguarding of machinery.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
